# ANNEXES OBAKE

Thanks to your support, each Obake show will have a costume manager (that we greatly look forward to meeting). Here are their tasks for the show:

- After the show, verify that all costume pieces have been retrieved
- Sort through the costumes to determine which items need to be machine-washed, and which ones need to be dusted off with a wet sponge before the next show. This will vary depending on the weather, the puddles, the amount of dust, etc
- If the leotards need washing, make sure to remove all padding before washing
- Please wash dance thongs/dancebelts (which will be covered in clay) and other fragile costume articles at 30°
- The costumes can be hung in the dressing rooms. The fabric will air dry quickly
- Leather shoe covers do NOT go in the washing machine!!
- Please check the seams on the costumes (especially on the 2 pairs of pants, the 2 leotards, the black sweatshirt and the grey long sleeve shirt) that will probably need to be mended by hand
- Please also check the bottom of the pant legs, where there will likely be rips in the seams

*Of course we will be there with you on site if any questions come up*

## Suggested materials
